

Assumicide

The unintentional endangering of patients, residents, staff and the business itself by ownership, management and caregivers who assume a handwash can be skipped without consequence:

1. Our current HAI rates are accepted by The Joint Commission.
2. We follow the CDC guidelines on handwashing.
3. Our compliance rates are confirmed by our secret shopper system.
4. I wear gloves.
5. I can't keep my patient waiting.

OVERCOMING UNDERWASHING
